###047

The religious and civilizational foundation and features of the development of the countries of the Far East. The role of Confucianism in China. The phenomenon of Japan

###048

The Genesis of European Capitalism and Colonialism

###049

The main stages and significance of the Great French Revolution in historiography

###050

The emergence of civilization in Ancient Greece, the periodization of its history. Difference from ancient eastern civilizations

Questions for the third block

###001

The role of higher education in the processes of social, economic and innovative development, its influence on increasing the intellectual potential of society in the context of modern globalization

###002

The main stages of the formation and development of the methodology of teaching history in universities of Kazakhstan

###003

Ways of formation and development of student's historical thinking skills in the study of history subjects

###004

Fundamentals of a teacher's communicative culture: pedagogical skills of a university teacher

###005

The personal-activity component of the communicative culture

###006

Psychological and pedagogical research of personality traits of students

###007

The psychological foundations of the educational process at the university and the role of student groups

###008

Lecture as the main element of the educational process. The basics of preparing lecture courses on national and international history

009

The Role of Practical History Classes in Higher Education Institutions in Developing Students' Critical Thinking and Skills in Working with Historical Data

###010

Independent work of students as the development of personality and self-organization

###011

The basics of pedagogical control in higher education

###012

Classification of educational technologies at the university

###013

Differentiated training. Individual differentiated training

###014

Intensification of learning and problem-based learning

###015

Active learning. Business game as a form of active learning

###016

The main requirements for successful learning in interactive technologies

###017

Project and research in the learning process

###018

Possibilities of information technologies to improve the efficiency of the educational process, change the content and methods of teaching

###019

Efficiency of using artificial intelligence in teaching history

###020

Theory and practice of historical knowledge

###021

Visual-visual and conditional-graphic methods as forms of classroom work

###022

Modern innovative technologies and methods of visual learning in the educational process

###023

Methods of visual learning in the educational process in secondary school

###024

Interactive lesson methodology: business game "History lesson at school"

###025

The basic principles of interactive learning

###026

The subject and objectives of the methodology of teaching history

###027

The role and place of methodology in teaching history at school

###028

The role of chronology in history lessons. Methods and means of presenting chronological data

###029

Introduction of independent history courses as a subject in educational institutions (early 30s-late 50s of the twentieth century)

###030

A school textbook and its components

###031

Teaching methods and their classification

###032

Reconstruction of historical education in the Republic of Kazakhstan. Characteristics of teaching history at the present stage

###033

Basic Methods of Presenting Historical Facts in Education

###034

Organization and management of history lessons in the process of using the interactive method

###035

Problem-based learning method – its impact on the development of critical and creative thinking of students, its difference from traditional teaching methods

###036

Independent activity of students in the development of theoretical material

###037

Studying the history of nomadic peoples in school lessons: Scythians, Kangyui, Uysuns, Huns

###038

The cognitive significance of the visual method in teaching history, the influence of its effective use on the formation of historical thinking of students

###039

The importance of using cartographic visual aids in historical education
###040

The study of historical documents as sources of historical knowledge
###041

Teaching students to write theses and summaries of historical works
###042

The role of fiction in teaching history, its influence on students' understanding and perception of historical events
###043

Types of school lessons and their classification
###044

Роль общих обзорных уроков по истории в систематизации знаний и их влияние на долгосрочное сохранение исторических знаний учащимися
###045

The study of historical phenomena and processes in history lessons
###046

Linking historical events and phenomena to temporal and spatial characteristics
###047

The specifics of studying the history of the Turkic period (VI-XII centuries)
###048

Ways to modernize historical education, its impact on the development of historical thinking skills of students in the education system
###049

The goal and principles of the inclusive education system are to ensure equal opportunities for students in the process of general education.
###050

Approaches to the analysis of historical thoughts in the program "Looking into the future: Rukhani zhangyru"
